LEWIS E. AUBURY
State Mineralogist

Printed at the State Printing Office, Sacramento
W. W. SHANNON, Superintendent . . .

CALIFORNIA MINES AND MINERALS

Compiled from Original Records of the State Mining Bureau.

THE mining interests of the State of California are so diversified, and the industry is extended over so wide an area, that it is difficult to describe the conditions which exist without using many pages of printed matter.

For this reason it has been considered proper, in this pamphlet, to give merely a record of results, which will show in plain figures what is being accomplished by the miners of the State. This record shows that some forty-two mineral substances are being exploited, the annual valuation of which is now \$46,776,085, and increasing as capital is invested and more mines are opened. The older mines, too, having been well developed and equipped, are increasing their annual output, and thus also proving their permanency and value with depth. For the past 20 years the total mineral output of California amounts to \$552,475,493.

The climatic conditions are favorable to mining operations throughout the State, and means of transportation have been so improved as to greatly lessen costs of supplies, etc. There are abundant opportunities for the safe and profitable investment of capital in the various branches of the industry, as numerous claims which have been located have never been properly developed or equipped, their owners lacking the necessary means.

The State Mining Bureau, maintained by State aid, provides numerous publications in the form of Bulletins or Reports, giving in detail the conditions existing in gold, copper, quicksilver, and all the various branches of mining. It also publishes maps of the counties which show the location of all mines, roads, streams, etc. The Bureau is in charge of a State Mineralogist, who has a corps of trained Field Assistants, and an office force as well. There is a fine technical library, and a very large museum showing specimens of all mineral products, suitably arranged for reference. There is also a well-equipped laboratory for the determination of minerals.

The Bureau publishes, among other things, an annual Statistical Bulletin showing by counties the output and value of all substances mined or quarried in California. From the latest bulletin of this character, covering the calendar year 1906, the figures and tables given in this pamphlet are taken, in the belief that they will give, perhaps, the best idea of what the mines of the State are producing and what the miners are accomplishing.

(This building is constructed of Colusa Sandstone and the reconstructed tower is of reinforced concrete.)

TOTAL MINERAL PRODUCT OF CALIFORNIA FOR 1906.

The following table shows the yield and value of mineral substances of California for 1906, as per returns received at the State Mining Bureau, San Francisco, in answer to inquiries sent to producers:

	QUANTITY.	VALUE.		QUANTITY.	VALUE.
Asbestos	70 tons	\$3,500	Magnesite (Crude)	4,032 tons	\$40,320
Asphalt	77,756 "	777,560	Marble	31,400 cu. ft.	75,800
Bituminous Rock	16,077 "	45,204	Mineral Paint	250 tons	1,720
Borax (Crude)	58,173 "	1,182,410	Mineral Water	1,585,690 gals.	478,186
Cement	1,286,000 bbls.	1,941,250	Natural Gas	168,175 M cu. ft.	109,489
Chrome	317 tons	2,859	Paving Blocks	4,203 M	173,432
Clays (Brick)	277,762 M	2,538,848	Petroleum	32,624,000 bbls.	9,238,020
Clays (Pottery)	167,267 tons	162,283	Platinum	91.46 oz.	1,647
Coal	24,850 "	61,600	Pyrites	46,689 tons	145,895
Copper	28,726,448 lbs.	5,522,712	Quicksilver	19,516 flasks	712,334
Fuller's Earth	440 tons	10,500	Rubble	489,208 tons	547,519
Gems		497,090	Salt	101,650 "	213,228
Glass Sand	9,750 "	13,375	Sandstone	182,076 cu. ft.	164,068
Gold		18,732,452	Serpentine	847 "	1,694
Granite	329,810 cu. ft.	344,083	Silver (commercial value)		817,830
Gypsum	21,000 tons	69,000	Slate	10,000 squares	100,000
Infusorial Earth	2,430 "	14,400	Soda	12,000 tons	18,000
Lead	338,718 lbs.	19,307	Tungsten		189,100
Lime	689,268 bbls.	763,060	Zinc	206,000 lbs.	12,566
Limestone	80,262 tons	162,827			
Macadam	1,066,164 tons	870,887			
Manganese	1 ton	30	Total value		\$46,776,085

In the previous year the total product was valued at \$43,069,225, so that the increase for 1906 is \$3,706,860. The most notable increases in value are in copper, gems, tungsten, and asphalt. For the first time zinc appears among the mineral products of the State.

The total value of the metallic substances (including precious metals) for 1906 was \$26,156,702, which includes gold, silver, pyrites, quicksilver, copper, lead, tungsten, zinc, platinum, and chrome. The silver is given in commercial value, or amount received for it by the producers. Metallic substances show an increase for the year of \$2,632,718, most of which is due to the great increase in amount and value of copper.

The total value of non-metallic substances was \$2,589,984, an increase of \$444,054 over 1905. These substances include borax, coal, mineral waters, salt, infusorial earth, gypsum, magnesite, manganese, mineral paint, fuller's earth, soda, tourmaline, and chrysoprase and other gems.

The total value of the hydrocarbons and gases was \$10,170,273, an increase of \$714,248. The hydrocarbons and gases include asphalt, bituminous rock, natural gas, and petroleum. The petroleum price is the average f. o. b. at wells or stations in each county. The number of barrels of oil produced was 32,624,000, valued at \$9,238,020, as against 34,275,701 barrels in 1905, valued at \$9,007,820. The increase in asphalt is very large for the year, it now being made in the process of refining the California heavy oils.

The total value of structural materials was \$7,859,126, a decrease of \$84,162 from the previous year. These materials include brick and pottery clays, Portland cement, lime and limestone, macadam, rubble and concrete rock, paving blocks, marble, granite, sandstone, serpentine, slate, and glass-sand.

The relative value of the principal minerals of the State is as follows: First, gold; second, petroleum; third, copper; fourth, clays and their products; fifth, cement; sixth, borax; seventh, silver.

All the asbestos produced in California in 1906 was from El Dorado and Placer counties. Asphalt was produced in the counties of Kern, Los Angeles, Santa Barbara, and Ventura. It was almost entirely derived from the refining of

petroleum. Bituminous rock was quarried in San Luis Obispo and Santa Cruz counties. Borax was produced in Inyo, San Bernardino, and Ventura counties. Brick clays were utilized in the counties of Alameda, Butte, Contra Costa, Fresno, Humboldt, Kern, Kings, Los Angeles, Marin, Mendocino, Merced, Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Shasta, Sonoma, Tehama, Tulare, and Ventura. Clay for pottery came from Alameda, Amador, Calaveras, Kern, Los Angeles, Orange, Placer, Riverside, and Santa Clara counties. Portland cement was manufactured in Napa, San Bernardino, and Solano. Chrome was mined in Calaveras, Tuolumne, and Shasta counties. Coal was mined in Alameda, Amador, and Monterey counties. Copper was produced in the counties of Amador, Calaveras, Fresno, Inyo, Mariposa, Placer, San Bernardino, and Shasta. All the fuller's earth came from Kings and Kern counties. Glass sand was produced in Alameda, San Francisco, and Monterey counties. Gold was mined in thirty-five counties of the State and silver was produced in thirty-three counties. Granite was quarried for building purposes, curbing, etc., in the counties of Madera, Nevada, Placer, Riverside, Sacramento, San Bernardino, San Luis Obispo, San Diego, Tulare, and Tuolumne. Gypsum was derived from Los Angeles County, and lead from Inyo, Orange, and San Bernardino counties. Infusorial earth came from Los Angeles, Monterey, and Santa Barbara.

Lime was quarried and burned in the counties of Amador, Contra Costa, El Dorado, Kern, Los Angeles, Monterey, Placer, Riverside, San Bernardino, Santa Cruz, Shasta, and Tuolumne; and limestone was quarried for beet-sugar factories, fluxes, paving, etc., in Calaveras, Kern, San Bernardino, Santa Barbara, Santa Clara, Santa Cruz, and Shasta counties.

Marble was quarried in Inyo, San Bernardino, and Tuolumne counties. Macadam quarries are operated in the counties of Alameda, Contra Costa, Los Angeles, Riverside, Sacramento, San Benito, San Bernardino, San Francisco, San Mateo, Santa Cruz, Solano, and Sonoma. The mineral paint came from Stanislaus County. Manganese came only from Plumas County. Magnesite was mined in Alameda and Tulare counties.

Mineral waters were bottled and sold from springs in the counties of Butte, Colusa, Lake, Los Angeles, Mendocino,

Monterey, Napa, San Benito, Santa Barbara, Santa Clara, Siskiyou, Solano, Sonoma, Tehama, and Yuba. Natural gas was commercially utilized in Sacramento, San Joaquin, Santa Barbara, and Ventura counties. Paving blocks were quarried and made in Riverside, San Bernardino, Solano, and Sonoma counties. Petroleum was derived from the counties of Fresno, Kern, Los Angeles, Orange, Santa Barbara, Santa Clara, and Ventura. Platinum was found in small quantities in the following counties: Butte, Calaveras, Humboldt, Placer, Plumas, Sacramento, and Trinity. Alameda and Shasta counties furnished all the output of pyrites.

Quicksilver was produced in Lake, Napa, San Benito, San Luis Obispo, Santa Clara, Solano, Sonoma, and Trinity counties. Rubble was quarried in the counties of Alameda, Los Angeles, Marin, Napa, Placer, Riverside, San Bernardino, Sacramento, San Diego, Santa Barbara, San Mateo, Solano, Sonoma, and San Francisco.

Salt came from Alameda, Colusa, Los Angeles, Marin, San Diego, and San Mateo. Sandstone was quarried in Colusa, Los Angeles, San Luis Obispo, Santa Barbara, Siskiyou, Ventura, and Yolo counties. The serpentine came from Los Angeles County, and the slate from El Dorado. The gems (including hyacinth, beryl, topaz, kunzite, tourmaline, and chrysoprase) came from Riverside, Sonoma, Tulare, and San Diego counties.

TOTAL GOLD PRODUCT OF CALIFORNIA—1848-1906.

While gold is still the leading mining product, its yield no longer puts the greatest gold-producing county in the first place. The copper of Shasta County, together with its other mineral products, gives it the leading place as a mineral-producing county. Gold is more widely distributed than any other substance thus far mined in California; 35 counties out of the 57 in the State showing a gold yield in 1906, and it is known to exist in several others.

The following table shows the total gold yield of California, by years, from the time mining commenced in 1848 to 1906, inclusive:

1848.....	\$245,301	1864.....	\$24,071,423	1880.....	\$20,030,761	1896.....	\$17,181,562
1849.....	10,151,360	1865.....	17,930,858	1881.....	19,223,155	1897.....	15,871,401

BANNER COUNTIES IN DIFFERENT MINERAL PRODUCTS—1906.

As far as the "banner" counties in the different mineral products are concerned, the following is the record for 1906, with the value of the material in which the county leads. It should be explained, however, that certain substances are put under the heading of "unapportioned," which includes product of single mines, etc., in counties, so as to conceal their identity. For this reason it is necessary to put under this heading, borax, soda, coal, Portland cement, fuller's earth, magnesite, lead, zinc, some gold and silver, and a few other substances formerly credited to certain

counties. This causes an apparent, but not real, falling off in output of Lassen, Los Angeles, Napa, Orange, Placer, San Diego, San Bernardino, Siskiyou, and a few other counties where these "unapportioned" substances occur. If credited to the exact county, where there is only a single operator, private business would be made public. Under these circumstances, the figures of value of output in some counties do not actually represent their relative rank, as some of the products may be placed under "unapportioned." Moreover, some counties lead in output of some substances placed in the "unapportioned" column, and these substances do not therefore appear after the name of the county, thus reducing the county total.

Alameda County leads in macadam (\$468,937) and salt (\$126,838); Butte in gold (\$3,016,747); Colusa in sandstone (\$101,802); El Dorado in slate (\$100,000); Humboldt in platinum (\$555); Inyo in lead (\$11,857); Kern in petroleum (\$3,765,200) and tungsten (\$183,600); Lake in mineral waters (\$160,000); Los Angeles in asphalt (\$259,200), brick clays (\$826,831), gypsum (\$69,000), rubble (\$176,559), and serpentine (\$1,694); Madera in granite (\$176,416); Placer in asbestos (\$2,500); Riverside in clay (\$59,712); San Benito in quicksilver (\$262,909); San Diego in gems (\$284,500); San Joaquin in natural gas (\$55,115); San Francisco in glass sand (\$10,500); Santa Cruz in bituminous rock (\$38,860) and lime (\$347,490); Santa Barbara in infusorial earth (\$13,800); Shasta in copper (\$4,338,121), pyrites (\$89,895), and silver (\$434,483); Sonoma in paving blocks (\$128,444); Stanislaus in mineral paint (\$1,720); Tuolumne in chrome (\$1,379) and marble (\$46,000). The unapportioned list includes borax, cement, coal, fuller's earth, some gold and silver, magnesite, lead, zinc, and soda; so none of these substances are considered in making up the leading products of the individual counties.

To show the wide distribution of mineral substances in California an analysis of the statistical table for 1906, published by the State Mining Bureau (Bulletin No. 47), proves that gold was mined in 35 counties; asphalt in 4; chrome in 3; brick clays in 27; pottery clay in 9; copper in 7; gems in 4; granite in 10; lead in 3; lime and limestone in 11; macadam in 12; marble in 3; mineral water in 14; natural gas in 4; paving blocks in 4; petroleum in 7; platinum in 7; quicksilver in 8; rubble in 13; salt in 6; sandstone in 7, and silver in 33. In certain instances other substances are mined or quarried in only one county.

VALUE OF MINERAL PRODUCTS BY COUNTIES FOR THIRTEEN YEARS.

The State Mining Bureau began, in 1904, to keep a systematic record of annual output of mineral products by county and value for the State of California. The year 1906 completes the thirteenth year of these records, and in order to put them in form for permanent reference a series of tables have been compiled showing what each county has yielded for this stated period. This information has already been published in the annual statistical sheets issued by the Bureau, but no attempt has heretofore been made to place in one table the record of any individual county so far as value of mineral products is concerned. These tables will be kept up in the future as fast as the annual records become available.

It must be, however, borne in mind that in the case of some counties the totals given do not embrace the entire value given for the period, for the reason that some of the products of these counties are grouped under the heading of "Unapportioned," to conceal products of single mines in said counties, or because it has become necessary to group the values of one or more counties when there was only one producer in one of the counties. For example, cement is placed under "Unapportioned" for the reason that while there are four producers, there is only one in each county, and the publication of output and value under the county name would make public the operations of each of the companies in those counties, to which they naturally object, since all replies to circulars of inquiry are considered strictly confidential.

The figures of value of the year do not therefore appear in the respective counties where the companies operated, but in "Unapportioned," so those counties where there are cement plants are not fully credited with what they actually yielded. The same thing is true of borax, coal, and some other substances, there being only one or two operators in each of the counties where these substances are produced. During these thirteen years the sum of \$18,787,212 has been placed under the heading "Unapportioned," and therefore the counties where these single operations are carried on lost credit for the respective amounts which make up the large total under that heading.

The tabular statement by counties for thirteen years is as follows:

VALUE OF MINERAL PRODUCTS BY COUNTIES FOR THIRTEEN YEARS.

CALIFORNIA MINES AND MINERALS

Issued by the

CALIFORNIA STATE MINING BUREAU

LEWIS E. AUBURY

State Mineralogist

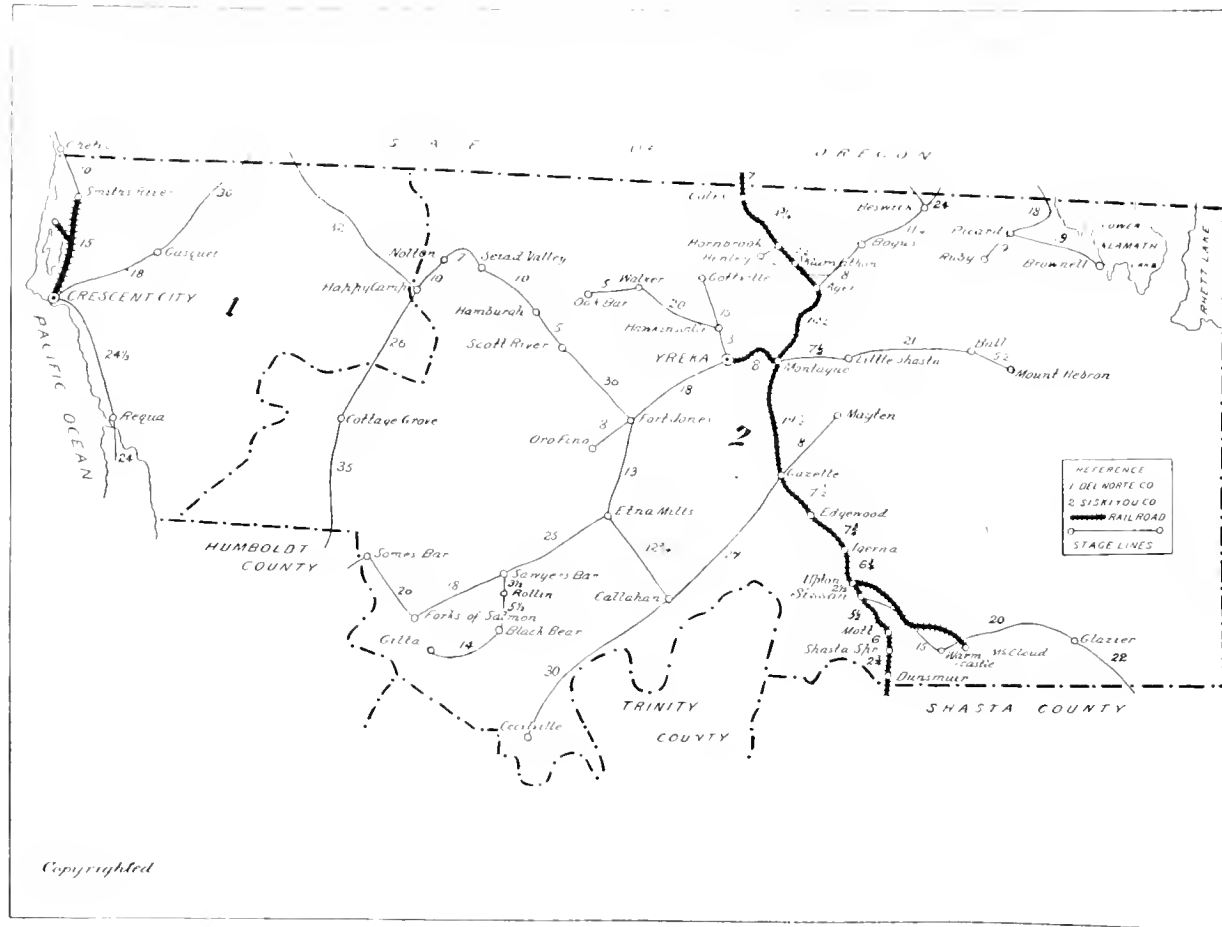

PACIFIC OCEAN

DEL NORTE AND SISKIYOU COUNTIES.

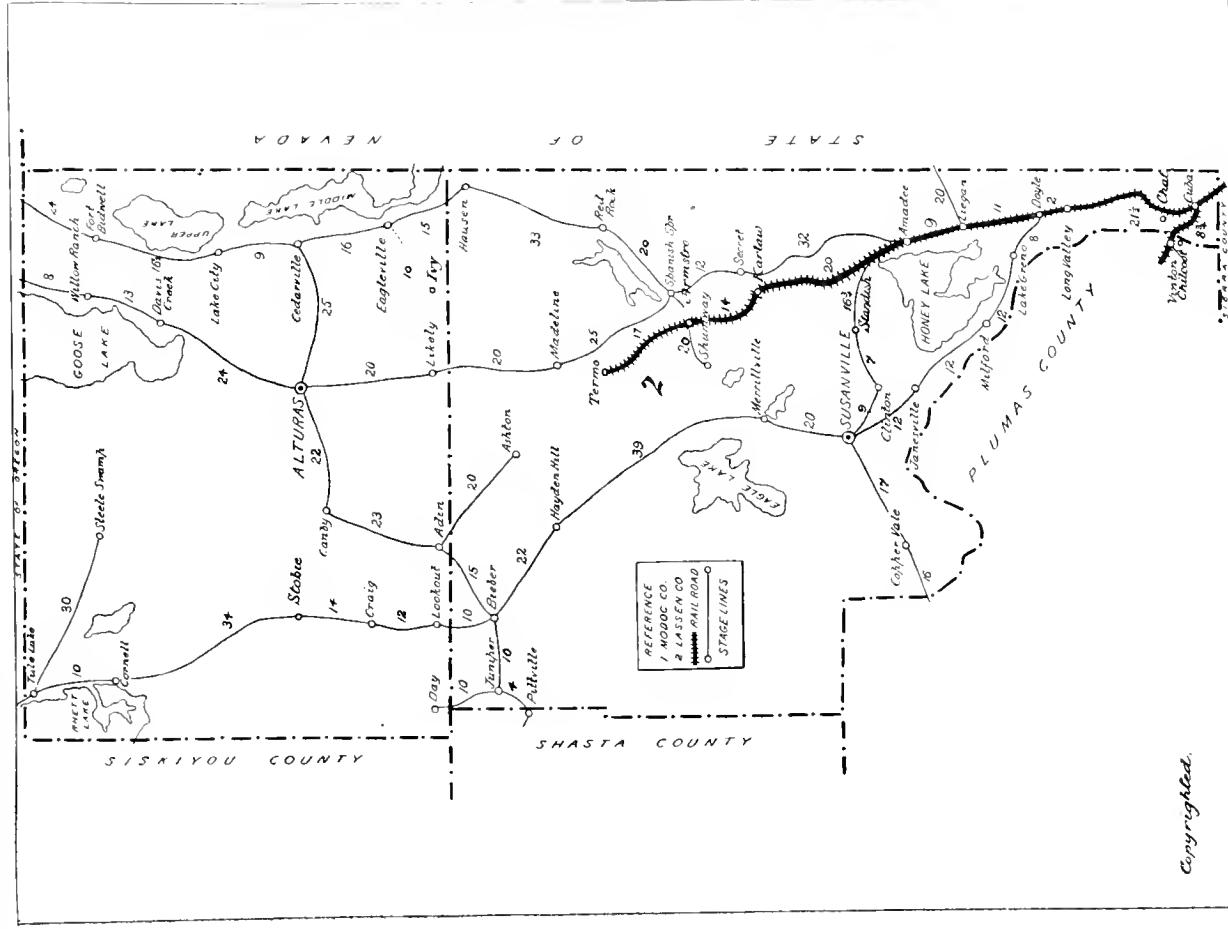

The County Maps.

The County Maps in this pamphlet were drawn expressly for the Fireman's Fund Insurance Company of San Francisco, and are the work of Mr. Lonis Weinmann, the secretary of the company. This company kindly loaned the original drawings of the maps to the California State Mining Bureau for making the plates of this little book. The maps are copyrighted and must not be reproduced without obtaining permission from the Fireman's Fund Insurance Company.

They show all towns, postoffices, railroads, county roads, stage lines carrying passengers, mail and express, and distances between points, forming a handy and useful guide, especially to all who wish to leave the railroad and penetrate to the interior of the mining districts.

LIST OF PUBLICATIONS OF THE CALIFORNIA STATE MINING BUREAU.

FERRY BUILDING, SAN FRANCISCO, CAL.

Publications of this Bureau will be sent on receipt of the requisite amount and postage. Only stamps, coin, or money orders will be accepted in payment. Do not send personal checks.

Address all communications regarding publications to Librarian. *All publications not mentioned are exhausted.*

Under Section 8, amendment to the Mining Bureau Act, approved March 10, 1903, your attention is respectfully called to that portion of the amendment which states: "The Board (Board of Trustees) is hereby empowered to fix a price upon, and to dispose of to the public, at such prices, any and all publications of the Bureau, including reports, bulletins, maps, registers, etc. The sum derived from such disposition must be accounted for and used as a revolving printing and publishing fund for other reports, bulletins, maps, registers, etc. The prices fixed must approximate the actual cost of printing and issuing the respective reports, bulletins, maps, registers, etc., without reference to the cost of obtaining and preparing the information embraced therein."

			Bulletin—Revised edition "Copper Resources of California"		

Samples (limited to three at one time) of any mineral found in the State may be sent to the Bureau for identification, and the same will be classified free of charge. *No samples will be determined if received from points outside the State.* It must be understood, that *no assays, or quantitative determinations, will be made.* Samples should be in a lump form if possible, and *marked* plainly with name of sender outside of package, postoffice address, etc. No samples will be received unless charges are prepaid. A *letter* should accompany sample, and a *stamp* should be enclosed for reply.

Address all Samples and communications regarding Samples to Laboratory.

**LAW RELATING TO MISREPRESENTATIONS OF MINES BY ANY OFFICER OF A CORPORATION
TRANSACTIONING BUSINESS IN CALIFORNIA. APPROVED MARCH 22, 1905.**

SECTION 1. Any superintendent, director, secretary, manager, agent, or other officer, of any corporation formed or existing under the laws of this State, or transacting business in the same, and any person pretending or holding himself out as such superintendent, director, secretary, manager, agent or other officer, who shall willfully subscribe, sign, endorse, verify, or otherwise assent to the publication, either generally or privately, to the stockholders or other persons dealing with such corporation or its stock, any untrue or willfully and fraudulently exaggerated report, prospectus, account, statement of operations, values, business, profits, expenditures or prospects, or other paper or document intended to produce or give, or having a tendency to produce or give, to the shares of stock in such corporation a greater value or less apparent or market value than they really possess, or with the intention of defrauding any particular person or persons, or the public, or persons generally, shall be deemed guilty of a felony, and on conviction thereof shall be punished by imprisonment in State prison, or a county jail, not exceeding two years, or by fine not exceeding five thousand dollars, or by both.

SEC. 2. All acts and parts of acts in conflict with this act are hereby repealed.

**THIS BOOK IS DUE ON THE LAST DATE
STAMPED BELOW**

AN INITIAL FINE OF 25 CENTS

WILL BE ASSESSED FOR FAILURE TO RETURN THIS BOOK
ON THE DATE DUE. THE PENALTY WILL INCREASE TO
50 CENTS ON THE FOURTH DAY AND TO \$1.00 ON THE
SEVENTH DAY OVERDUE.
